Types of problems

- Baseball example
- Checkbook example
- Use class functions from Poly.h or List.h
- Design a class and implement it in C++
  - Pseudocode for main
  - Specify classes, functions
- Write a program design

You should be familiar with Poly.h and List.h.

I have added a few more comments to ListP.h explaining what each function does.

Note: I might ask you to do various things using the functions in class Poly, class Term, or class List.

I will provide you with those header files, and you should be familiar with Poly.h and ListP.h.
